Ayush Bire

Mohali
8552060374

I am a motivated and disciplined individual with a strong academic foundation, having passed 10th and 12th with good percentages. Along with formal education, I have completed the CCC and Typing courses, which have helped me build a solid base in computer operations and communication. My interest in technology led me to learn Python programming and version control tools like Git and GitHub. I am also currently exploring web development with HTML, CSS, and JavaScript. I am eager to grow in the IT field, continuously learn new skills, and take on real-world challenges with confidence.
